SUMMARY

Results-driven engineering graduate with strong skills in **Python** and **SQL** programming, coupled with practical knowledge of **Cloud Computing** platforms and services. Experienced in developing efficient solutions using cloud technologies and databases. Quick learner and effective communicator, eager to contribute technical expertise in dynamic environments.

TECHINICAL SKILLS

- **Programming:** Python, C++, SQL
- **Tools and Frameworks:** vs code, Jupyter notebook
- **Cloud & Deployment Skills:** AWS (S3, EC2, RDS)
- **Version Control & Collaboration:** Git, GitHub
- **Competencies:** Object oriented Programming, DBMS, Operating System, Computer networks, Cloud Computing, Data Structures.
- **Soft Skills:** Effective communication, active listener, Adaptability, Fast learner.

EDUCATION

Medi-Caps University, Indore B-Tech: Computer Science Engineering: CGPA: 8.02	2021-2025
South Indian Cultural Association School No.2, Indore Senior Secondary – Class 12 th , CBSE: Percentage: 80.20%	2021
South Indian Cultural Association School No.2, Indore Secondary – Class 10 th , CBSE: Percentage: 73.50%	2019

PROJECTS

Smart Image Toolkit

- Developed a Python-based application featuring advanced image analysis capabilities including blur detection and duplicate image identification.
- Implemented efficient algorithms to enhance image quality assessment and management.
- Built a user-friendly GUI using Tkinter for seamless interaction and real-time feedback.
- Technologies used: **Python, OpenCV, Tkinter**

Face Recognition Attendance System

- Developed a real-time attendance tracking system using **Python and OpenCV**, reducing manual effort by **80%**.
- Achieved **95%+ face recognition** accuracy using advanced machine learning techniques.
- Integrated **Git for version control**, ensuring smooth collaboration and project tracking.

CERTIFICATIONS

AWS Academy Graduate - AWS Academy Cloud foundation and Architecting Completed the AWS certification, which deepened my skills in designing secure, scalable, and cost-effective cloud architectures on AWS. It covered key areas like high availability, networking, and data management, enhancing my ability to architect and deploy robust systems in the cloud	June 2024
"Learning Python: The Complete Python Programming Course" Completed acquiring comprehensive skills in Python programming and enhancing problem-solving abilities.	Udemy-2023
